Memphis, Tenn.

## TRI-STATE FEW MINERS WORK DISTRICT 19

Some Miners Await End of Washington Conference Before Entering Mines.

KNOXVILLE, Tenn., Nov. 15.—The situation in the Kentucky-Tennessee coal fields is practically unchanged, possibly fewer men working than had begun on the previous day. The explanation of the miners' most frequent complaint is that the order rescinding the strike call did not bear the official seal of the United Mine Workers of America. In some places the men declare they will not return to the mines until the outcome of the Washington conference is known.

Operators who have been preparing each morning to resume work are tiring of the expense involved with no production to offset it and there is talk that many of the mines after Monday may suspend until further notice unless the miners show a willingness to dig coal.

It seems possible in case the agreements under which the miners are working are wiped out that it may be the beginning of a long and bitter struggle in this field, the outcome of which none can forecast.

Meetings held by the miners in various camps Thursday night resulted in a vote to return to work only at Oneida, Tenn., where three local unions said to be from 300 to 400 strong had decided to enter the mines Monday morning.

Union officials say they have given out the order rescinding the strike and add they can not force the men to work if they do not see fit, also they freely admit the men resent the fact that the operators in this district did not go to Washington and it is believed little surprise would be felt if the entire district again is idle Monday instead of more mines working.

## TWO MORE RIOTERS TO BE TRIED AT HELENA

HELENA, Ark., Nov. 15. (Sp.)—Ed Ware, negro, who had been sought by authorities all over the country and arrested several days ago at New Orleans, will go on trial Monday for first degree murder in connection with the insurrection at Elaine and Hoop Spur early in October. He was brought here from New Orleans and placed in jail Wednesday. Richard McFarland, a white negro, was brought with him, and it is understood his case will also come before the courts Monday for trial as a participant in the race trouble. The specific charge on which Ware will be tried will be for the killing of James Tappan and Clinton Lee, two Helena boys, who were members of the sheriff's posse at the outbreak of the trouble. It is understood the negro will deny his guilt. The court granted Ware's request for the privilege of securing his own counsel when the judge selected two local attorneys to defend him.

Ware admits he was secretary of the Hoop Spur lodge, and was present at the meeting on the night of the shooting at the church when W. A. Adkins was killed and Deputy Charles Pratt was severely wounded. He further admitted his presence the following day during the battle at Hoop Spur and that he was armed with a high-powered rifle.

## KNOXVILLE PRISONER IS HELD AT ASHEVILLE, N. C.

KNOXVILLE, Tenn., Nov. 15.—A man believed to be Worth White, convicted of murder of Sam Greer, in Blount county, who escaped from the Knox county jail Aug. 31, the night it was stormed in an effort to lynch Maurice Hayes, is being held at Asheville, N. C. According to information received here the man who gave his name as Williams was arrested on the charge of forging checks, and was identified by reward posters bearing his picture.

It was alleged that White bought a farm in Tennessee, and was brought to Knoxville to be held in connection with the Greer case. White claims he was accidentally killed while rabbit hunting.

White had worked in a lumber camp near Asheville and Sheriff Cate has just returned from that section in search of him.

A similar evolution seems to be taking place with the automobile. We find today more closed cars in use than ever before, and little by little the production of the closed styles is creeping up on that of the open ones.

The reason for this is that the automobile purchasing public is realizing more and more the all-season value and usefulness of the closed car. In cold and inclement weather it can be used as readily and as conveniently as under ideal motoring conditions. In warmer weather, by lowering the top, the closed car has the same advantages as the open car. The people are becoming educated to the facts and are demanding closed cars. For that reason we are now planning to divide our production equally next year between the open and closed car styles.

## THOUSANDS OF ACRES OF ARABLE LAND WILL BE ABOVE HIGH WATER.

YAZOO CITY, Miss., Nov. 15. (Sp.)—The building of the Brunswick levee, raising thousands of acres of swamp lands in Mississippi's richest delta section to an arable height, now seems an assured fact. The proposition now has the indorsement of both the present levee boards in the district, of every county in the district, of the engineers of the boards and of federal engineers who have viewed it, and the two levee boards have concurred in the framing of a bill which will be introduced into the next session of the Mississippi legislature with hardly a chance of failure.

The Yazoo-Mississippi delta levee board was the last to take action on the matter of the forming of the new district and a special meeting of that board was held at Clarksdale Tuesday of this week for the purpose of considering the proposition. Every member of the board, with one exception, together with large delegations from Vicksburg and from Iaquena, Warren, Washington and Yazoo counties, the president of the board of Mississippi levee commissioners, W. L. Thompson, who is the chief engineer of that board, and a number of others were present.

Some objections were found to a bill which has been prepared, and which was submitted on the occasion, and a committee was appointed to confer with a like committee of the lower levee board and those committees prepared the bill which received the indorsement of the body.

When the proposition of the building of the Brunswick levee was last submitted to the legislature, it became entangled with the proposition of forming of the new county of Humphreys and with other matters which caused its defeat. So far as is known now, the last opposition to the forming of the district has been cleared away and the matter is sure to be passed by the next legislature of this state. Engineers estimate that the new high water level, if the levee has been built, will be from two and a half to five feet.

## HAYNES OUTPUT IN 1920 TO BE HALF OPEN HALF CLOSED

Fifty per cent of the automobiles produced next year by the Haynes Automobile company, Kokomo, Ind., will be closed styles, according to plans now being formulated. The other 50 per cent will consist of open models. This equal division in the production of the open and closed styles by a major car institution of the size and valuer of the Haynes company is believed to be without precedent in the automobile world, according to Thomas F. Straton, of the Stratton Auto company, local Haynes distributor.

Not only is it a departure from the older division of production, but it also is tremendously significant in that it marks the beginning of a new era in the automobile history of the country—an era in which the closed car, long in the minority, will lead away as the popular favorite of the automobile buying public.

Hepetofore, open cars were manufactured in greater quantities than closed styles. Gradually, however, the closed cars have been growing in favor until now it is probable that the production of the closed styles is creeping up on that of the open ones.

"One needs but turn to the evolution of the street car to see an analogous situation," states Mr. A. G. Selberling, vice-president and general manager of the Haynes company. "Practically all of the earlier street cars were open cars. Then came a period in which we had 'summer' cars and 'winter' cars. Today practically all street cars are closed styles, with window arrangement whereby they may be transformed into open, airy vehicles during the summer months. The 'open' street car is a thing of the past."

## YAZOO BANKS WIN BACK TAX SUITS IN COURT

YAZOO CITY, Miss., Nov. 15. (Sp.)—Yazoo City's three banks won a legal victory in circuit court now in session in this county yesterday in the matter of back taxes for which the state is suing and which are said to amount to more than \$100,000. The suit has been brought by Stokes Y. Robinson, state revenue agent, and the Bank of Yazoo City, The Citizens Bank and Trust company, and the Delta Bank and Trust company are involved.

At the direction of the state revenue agent the county assessor raised the assessment of the three banks to what the state revenue agent claims to have been their proper valuation for the years 1910 to 1915, inclusive. The increased assessment means a very considerable sum and the banks objected to the assessment. The Yazoo county board of supervisors declined to approve the increased assessment and the suit was brought by the state revenue agent to enforce the payment of the back taxes.

Competent attorneys represented each side in the controversy, and local people were much interested in the outcome of the case. The decision in the circuit court dismisses the case, but it is expected the state will appeal from the local decision.

## There It Is!—the Honor Sign of Columbia Storage Batteries

THE Pyramid Seal stamped on each Columbia Storage Battery is the finishing touch to the guarantee—definite power for a definite time.... Back of that guarantee is an organization of battery builders with a worldwide reputation for making good.

We Recharge and Repair All Makes of Batteries—Free Inspection

## PHYSICIAN ESCAPES DEATH THREE TIMES

BLUE MOUNTAIN, Miss., Nov. 15. (Sp.)—Dr. Hubert Carter, of this place, now on the city health force of Memphis, has just had three narrow escapes from a tragic death in one day. Dr. Carter was standing near a heavy gate which under its heavy weight, and almost caught him under its heavy weight. He escaped by leaping into a bunch of wild horses which happened not to kill him with their kicking. The gate cut one of his shoulders as it crashed in the ground. On the same evening while driving in his automobile, another car ran into his machine, making an ugly cut on Dr. Carter's face and wounding him in one of his knees.

Three shaving conveniences are compactly arranged in a small cylindrical aluminum case which is described in the December Popular Mechanics Magazine. A talcum powder can, fitted with a perforated cover, telescopes into a tubular receptacle which serves as a brush handle and as a container for shaving cream.

## Dress Up Your Car

We'll make your car look like new. Our years of experience guarantees your satisfaction in both price and quality of workmanship.

## MANY BREAKDOWNS OCCUR

No matter where you are when your car or truck goes dead, get to a phone. We'll do the rest.

We're open twenty-four hours in the day when there's work to be done. You'll find our work satisfactory in every respect; our prices doubly so.

**QUALITY MOTOR CAR CO.**  
397 Union Ave. Main 429.

A prospect walked into our salesroom the other day, stepped up to a row of Chevrolets, and began a personal inspection. He didn't look much like a car buyer.

"Can we interest you in one?" politely asked a salesman.

"No, young man, you cannot," replied the prospect. "I'm already interested. Been driving one for two years—cost me only 60 cents for repairs."

Of course he bought another.
